DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

2. Claims 1-16 are rejected under 35 U.S.C. 102(e) as being anticipated by Cayla et al. (US 2004/0004949).

A. Regarding claims 1, 4, and 12, Cayla et al. discloses a method and apparatus for optimizing the allocations of resources comprising the following:

- A mobile entity or transceiver (figure 2).
- A base station (figure 2).
- A RNC (figure 2) that is configured to do the following:
 - Calculate the load or evaluate resources for each cell (figure 5, item 131).
 - Determine whether a resource unit or timeslot can be reduced for the least loaded cell (figure 5, item 133).
 - Reassign resources by transferring on resource unit or timeslot to the highest loaded cell (figure 5, item 138).

Art Unit: 2643

- B. Regarding claims 2, 5, 8, and 13, Cayla et al. discloses that the cell load can be determined in time periods to avoid oscillation and unstable behavior (page 4-5, paragraph 0045).
- C. Regarding claims 3, 6, 10-11, and 15-16, Cayla et al. shows in figure 2 that the RNC is a part of a RAN or LAN and the BS is an access point for a mobile entity.
- D. Regarding claim 7, Cayla et al. shows a method flow diagram in figure 5 that follows the steps disclosed in the claim.
- E. Regarding claims 9 and 14, Cayla et al. shows in figure 5 that the step of calculating the load on each cell is performed if resources are reassigned.
